Bug ID	Severity	Bug Description	Root Cause Analysis	The Fix	Status *(Resolved/ Unresolved)*	Visual Evidence		Code Snippets
D001	Low	Student account created successfully; but it redirect to login page instead of dashboard. It then resulted to: Students must be able to sign up their accounts in the system using their institutional account via in-system login fields	The root cause for this is the route trigerred after inputting the signup credentials and clicking the sign-up button, it redirected the user back to the login ("/login") rather than the dashboard route ("/dashboard"). This was intended to prompt users to reauthenticate themselves before logging in to test their newly created credentials. Although this causes an additional workload for the users.	The programmer redirected the route upon signup from going login to dashboard. This simplifies the navigation logic and minimize user burden upon system navigation. By also altering the authentication rules (on signup), it immediately saves user session upon sign up, rather than prompting users to signup then manual loggin in. This then ensures that the user experience is enhanced.	Resolved		https://drive.google.com/file/d/1DBA4icX-zdrNchYuHX1Ig0wZRAEwW2Ui/view?usp=sharing	https://drive.google.com/file/d/1ypmLwdROvfL_7wOEye4d0uU0L9NDl6tq/view?usp=sharing
D002	High	It accepts even non-institutional emails	Users should not be able to sign up if institutional email domain is invalid. An error message should be displayed. Since the application is used in an academic settings, any individuals with no institutional emails shall not have any access to the system at all. Further deliberation is required	Instead of checking the full email address, the code I added isolates the part that defines the institution (domain) and validates it against an approved list.	Resolved		https://drive.google.com/file/d/1qhBE2cd3ToE2XOOBQgRKeWNiFttGzpUH/view?usp=drive_link	https://drive.google.com/file/d/1C72fh5hvUp8wZxNfVvss0_kDDuheSYQM/view?usp=drive_link
D003	Cosmetic	Student received a notification for a pending request; should only notify when approved.	Students can submit consultation request while instructor is instructed to not approve the request. This scenario simulates that the instructor's inaction should not cause any notification notice on the student's end. However, upon testing --student test users was able to receive notification. Further deliberation should be required.	See screenshot as proof that student did not recieve a notification when submitting a pending request. Although the Instructor will be notified of the pending request by the student. The tester must have mistaken the instructor account as student accou\nt	Resolved		https://drive.google.com/file/d/1TmwgB2vQR2egM_r8-HJQqKsLFvnBUdd1/view?usp=drive_link	N/A
D004	Medium	Students must be able update their account password via settings. It resulted to fail.	This happened upon the inputs entered by the user. There were complications in inputting the new password. Upon re-entering it, it says that the new password and re-entered password do not match. Further , investigation should be conducted	Upon further inspection, the code logic works as intended. The inputs and function were evaluated. The system also detects invalid inputs (i.e. Similar password credentials like the last one). What happened was that the user double-clicked on the change password button, thus making 2 requests using the same inputs (old password, new password, re-entered new password). Although, the system detects these requests as an error due to duplication. In order to mitigate this, see password function for accessibility.	Resolved		https://drive.google.com/file/d/1U_6aVcskJUWu5UvjRRehtN8WaTyLJFov/view?usp=sharing	https://drive.google.com/file/d/1ZTHZpOtotVYlxF1-j60T5-yuMth8E6x3/view?usp=sharing

D005	Medium	Instructors must be able to approve a pending student consultation request.	Instructor's functional feature: approving a student-requested consultation is somehow inaccessible. Investigation is necessary.	After proper inspection and analysis, I've concluded that the logic works as it should. There were no errors or defects in the way our system handles this action.	Resolved		https://drive.google.com/file/d/1QvIMcNwGfPGgOwsuu2C6F-mNul6RTknA/view?usp=drive_link	N/A
D006	Low	Instructor was able to set end time before start time; validation missing.	Instructor should not be able to add availability with invalid time range. i.e. 12pm - 8am. Further investigation is necessary.	The programmer decided to set some baseline or conditions to better set time of availability in a feasible approach. The system employed constrictions such as only accepting inputs that are within the working hrs or adjacent (5am - 10pm). Setting a time/schedule beyond the aforementioned condition will result to error notice.	Resolved		https://drive.google.com/file/d/1TY8IS-VnAjyHfoJgYGayzCaWyhsLuZd4/view?usp=sharing	https://drive.google.com/file/d/1pbD554nKAWG_cD5sn7t0glk-q-J6TihE/view?usp=drive_link
D007	Cosmetic	System accepts duplication in consultation category	Network error message; process interrupted. Must be noted.	Created a copy of existing consultation category where the titles are lowercase, used that to check for duplication to ensure non case sensitive duplication detection	Resolved		https://drive.google.com/file/d/1OGCM7KeKzY8vIF1w-VHcPteVUwiwgvhu/view?usp=drive_link	https://drive.google.com/file/d/1CkJ-rlQ-RbyBkN9vrGS-Mdr1bbJU_zMs/view?usp=drive_link
D008	Low	It always says check your current password even though I input the correct current password	Instructors must be able to update their account password with validation and confirmation. However, the testing yielded negative results, not satisfying the expected outcome. Investigation is necessary.	Updated the code to show a more comprehensive error message when updating password	Resolved		https://drive.google.com/file/d/128Gw2i-DcIviaAYh0hrCsZlaPNqG851N/view?usp=drive_link	https://drive.google.com/file/d/1ig_xRYqoX9gjUw7rJQrqtsRGut_oc5jy/view?usp=drive_link
D009	Low	Setting a new password in Instructor view doesn't work. Errors in re-entering new password faults.	Instructor should not be able to change password if new password and confirmation do not match. The tester seems to have deliberately misconfigured the new password and the re-entered new password field to test the limits. The dissarray deviates to the expected outcome. Further evaluation should be considered.	Upon retesting the said component, the inputs were pursposefully misconfigured in order to demonstrate such similar scenario. As for the results, the testing yields positive outcome by actually not saving the new password if it doesn't match with the re-entered and erroneous credentials.	Resolved		https://drive.google.com/file/d/19M8CSvWPtKWAD2sfeOdBSOrWY9gCANR-/view?usp=sharing	N/A
D010	Low	Role creation should require at least one permission.	Adding a new admin should necessitate a role with no permissions. Investigation is necessary.	Our system is designed to not have any permissions set upon creating a role, as permissions are meant to be added after said role has been created. Even so, our system as it is, before debugging, does not accept role modifications with no permissions set.	Resolved		https://drive.google.com/file/d/1fyjTD6cAgcsff_VbhevLeZNk0YPpW19L/view?usp=drive_link	N/A

D011	Cosmetic	Invite with invalid email format	Instructor/admin invite should have a valid email formatting. It must be noted.	Our system, even before debugging, does not accept invalid inputs in the email field when inviting instructors.	Resolved		https://drive.google.com/file/d/1pCNYWhTgCN2VULP0X_rhJQb84WL_-GVK/view?usp=drive_link	N/A
D012	Cosmetic	Must show "No Data Found"	Search filter logs should say "no matching data" if no data is located based on the inputs the user has provided.	Changed the text from "No logs found" to "No Data Found"	Resolved		https://drive.google.com/file/d/1RqEeml4jN2SCmFqf8rqbjXx6l2E2g5-m/view?usp=drive_link	https://drive.google.com/file/d/1Uoum_WjSPrAwkt1U8QbBoA1s2DG8jhg_/view?usp=drive_link
D013	Low	Searching for student/instructor name does not always update the list correctly.	Admins must be able to search consultations by student or instructor name dynamically and timely. Updating the information is necessary.	Searching for "juan" yields results because the system performs a broad partial match across individual database columns like first or last names. In contrast, searching for "nick xylan" likely fails because the query treats the space as a literal character and searches for the combined string within a single field instead of splitting the terms. The consultation search feature empowers administrators to quickly filter records by querying the specific names of students or instructors associated with each appointment. This administrative tool streamlines the oversight of academic schedules by ensuring that individual consultation histories are easily retrievable through a centralized search interface.	Resolved		https://drive.google.com/file/d/1ird1Q7hfYWdtxbiB95RataDqHl6C7hJm/view?usp=drive_link https://drive.google.com/file/d/1jS69R9erDqoKNLaaqKue34kUsluzullk/view?usp=drive_link	N/A
D014	Low	Admins must be able to search consultations by student or instructor name	Admins must be able to search consultations by student or instructor name. Search field functions is necessary and must be taken into account.		Resolved		https://drive.google.com/file/d/1ird1Q7hfYWdtxbiB95RataDqHl6C7hJm/view?usp=drive_link https://drive.google.com/file/d/1jS69R9erDqoKNLaaqKue34kUsluzullk/view?usp=drive_link	N/A
D015	Low	"Terms and Conditions" in Login must be interactive	On the login page, the "Terms of Service" text should be interactive, allowing users to access and read the system's Terms of Service.	I've implemented a Terms of Service page for the platform, which users can now easily access through a dedicated link on the login screen.	Resolved		https://drive.google.com/file/d/1NTmV_qDYtcTnW4cli9jekvu8Nnzn1adl/view?usp=drive_link	https://drive.google.com/file/d/1JV-eneZE0p_kLVUS6Y6gFoeUs0YJzafK/view?usp=drive_link
D016	Low	"Privacy Policy" in Login must be interactive	On the login page, Privacy Policy should be accessible and interactable.	I have added a privacy policy page for the system and made it so that the user can access it via the hyperlink in the login page.	Resolved		https://drive.google.com/file/d/1tvm1csoeJcLR0Q-k6Dj1tUkUj-3RB8fS/view?usp=drive_link	https://drive.google.com/file/d/1tljYvu5VMheqNL6LKmjZFjP0rpVEc7IH/view?usp=drive_link

D017	Low	Accepted consultations list sometimes shows mixed statuses.	Accepted lists should be assorted and must be presented in an organized manner in the admin view.	There is no dedicated tab for "accepted" consultations, it is supposed to be a mixed of accepted and completed consultations under the upcoming tab	Resolved		https://drive.google.com/file/d/1eAlT_KAidHntEhq_8SN2DjqyQET9Te51/view?usp=drive_link	N/A
D018	Medium	Approved consultation did not appear in Google Calendar.	Students must be able view their approved consultation schedule through Google Calendar. Appropriate measures and investigations must be conducted promptly.	The identified issue can be found due to user disabling the calendar linkage. attached in the screenshot is an evidence that it does create and event in google calendar. the system actually provides an information via "toast" popup indicating the a google meet was not created upon accepting a consultation while not linking your google gcalendar	Resolved		https://drive.google.com/file/d/1l3OVG0K_2GlvHnV0JbrXdlWihGn9qxdW/view?usp=drive_link	N/A
